

Abu Tubul Block 60

Factory Grade™ GTS-PP & GTS-PE applied by IntelliCOAT™

Project Background

The Abu Tubul Block 60 project was developed by the Oman Oil Company Exploration & Production LLC (OOCEP) for the Abu Tubul Field.

The project scope included 60 wells drilled and connected with flow, gathering, and export pipelines leading into a newly built gas processing plant at Abu Tubul.

Canusa-CPS successfully deployed the patented IntelliCOAT™ system, which automates the installation of our Factory Grade GTS-PE (3LPE) and GTS-PP (3LPP). For consistent end-to-end performance on-site, Canusa-CPS was subcontracted for both the supply of material, and provision of trained and experienced Field Service Engineers for the duration of the project to operate the IntelliCOAT™ system.

At a Glance

Project Name	Abu Tubul Block 60
Date	2012 - 2015
Country	Sultanate of Oman
Market	Onshore, Oil and Gas
Product	GTS-PP and GTS-PE, installed using IntelliCOAT™
Owner	Oman Oil Company Exploration & Production LLC (OOCEP)
Contractor(s)	Al Hassan Engineering Company and Gulf Petrochemical Services
Pipeline length	Export Lines, 70kms of 8" and 16" Gathering Lines, 100kms of 4" to 8"
Pipe OD	4" to 8", 16"
Mainline Coating	3LPP and 3LPE

Since 1967, Canusa-CPS has been a leading developer and manufacturer of specialty pipeline coatings for the sealing and corrosion protection of pipeline joints and other substrates. Canusa-CPS high performance products are manufactured to the highest quality standards and are available in a number of configurations to accommodate many specific project applications.

The product information shown here is intended as a guide for standard products.

Consult your Canusa representative for specific projects or unique applications.
