

PRODUCT REBRANDING

Scar-Guard® replaces the Canusa Wrapid Shield™ product line

The Canusa Scar-Guard® and Wrapid Shield™ product line is a moisture cured, fiberglass composite ARO system that is used to protect the corrosion coating on directionally drilled pipelines.

As of April 1, 2017, the Wrapid Shield™ product line will be rebranded as Scar-Guard®.

This new brand will now include two product configurations: Scar-Guard® and Scar-Guard® XL.

Scar-Guard (new product)

- Consists of a 34-mil fiberglass that is applied in a single pass at a 50% overlap. Total thickness is 68 mils.

Scar-Guard-XL (Wrapid Shield-XL → Scar-Guard-XL)

- Consists of a 13-mil fiberglass that is applied in four passes at a 50% overlap. Total thickness is 104 mils.

Further details on Scar-Guard® are published on the Product Data sheet available on Canusa-CPS website: http://www.canusacps.com/non_html/pds/PDS_NA_SCG.pdf.
